Connecting Your Mobile Device to Use the Secure Gonzaga Community Wireless Network and to Read Your Law School E-mail

**Important Note:** Instructions can vary from device to device and between wireless carriers (AT&T, Verizon, etc.); therefore, it’s important that you rely on the product and network specific instructions that come with your device and are given to you by your carrier. The basic configuration information below is intended to provide assistance and is not a step by step guide.

**Wi-Fi ⇒ Gonzaga Community**

When prompted for username if you were not asked to configure for the domain, iPhone users in particular, you will need to type our domain name in front of your username. For instance, gonzaga\<username>

Your E-mail address ⇒ <username>@lawschool.gonzaga.edu

Password ⇒ (case sensitive network password)

Server Name ⇒ gemweb.gonzaga.edu

Domain ⇒ gonzaga

SSL required ⇒ Yes

Note: Gonzaga Law School alumni who have not been migrated to the gonzaga domain should continue using the gonzlaw domain until further notice.

**Some helpful notes for your configuration journey:**

- Do not choose POP3 or IMAP when configuring your smartphone. Instead the option to select will be Exchange, Microsoft Exchange Active Sync, Corporate Email, or Corporate Sync.
- On some phones, Androids in particular, you may be prompted for Domain\Username when configuring. In this field type in gonzaga\<username>.

If you have any questions or need assistance, please call or stop by Dalean Neiner’s office, located on the first floor of the library.
